

T.A.S

Tactical Aerostat System

The T.A.S is an advanced aerial surveillance system, based on super-light stabilized payloads, mounted on a small and very easy to operate tethered Aerostat.

Applications:

Military

- Surveillance, reconnaissance and target acquisition
- Border and Coastal surveillance
- Intelligence
- Training aid
- Search and rescue
- C⁴ISR

Non Military

- Public order
- Media coverage
- Law enforcement
- Traffic control
- Aerial relay
- Fire control

Main Features:

- 360° observation coverage
- Small size Aerostat
- Day / night surveillance capability
- User friendly
- Low maintenance and operation costs
- Video multi receiver architecture.
